Significant Contributions of IQAC:

- Conducted Academic and Administrative Audit by the former Vice-chancellors of Adikavi Nannayya University and Acharya Nagarjuna University.
- Collected feedback from stakeholders on teachers.
- Conducted coaching classes for the UGCNET / APSET aspirants.

Best Practice:

1. Title of the Practice: Student Wellness Assessment & Psychological Counselling

2. Goal

To support the students to adjust to the classroom environment, work through their present and future concerns and achieve their goals.

3. The Context

A large number of students are identified with a lack of interest in studies, are unhappy with their relationships and unable to decide on career choices. To help our students with these issues, we are facilitating psychological counselling.

4. The Practice

- The process is structured as Assessment, Identifying issues and providing Counselling for the identified issues. The college assesses “Students’ Wellness” on a regular interval to identify students’ academic, family, personality, social and health issues. The assessment was done on a sample of **555 U.G** students from **B.A, B.Com, B.Sc.** and **B.B.A** Group volunteered to participate in the assessment. More than five hundred students were assessed in one year and the identified students were provided counselling for the same.
- Students from **B.A** group are experiencing more Academic related issues (53%) followed by Family (31%), Personality/Adjustment (27%), Health and Behaviour (16%) and Social Relationships (12%)
- Students from the **B.Com** group are experiencing more Academic related issues (20%) followed by Family (15%), Personality/Adjustment (11%), Social Relationships (4%) and Health and Behaviour (3%)

- Students from the B.Sc. group are experiencing more Family-related issues (56%) followed by Academic (54%), Personality/Adjustment (39%), Social Relationships (6%) and Health and Behaviour (5%)
- Students from B.B.A group are experiencing more Academic related issues (4%) followed by Family (3%), Health and Behaviour (2%) Personality/Adjustment (1%), Social Relationships (1%)
- Group counselling and individual counselling processes are used to support students. Students who needed help, but hesitated to seek help were motivated by group counselling.

5 Evidence of Success

A good number of students learned to identify and express their issues, adjust to life issues effectively and are able to improve their relationships. A positive impact on students' well-being is noticed. It is also noticed that improvement in emotional well-being translated into academic improvements like reduced absenteeism, unhealthy coping mechanisms and changing decision to drop out of college. Many students reported that counselling helped them to manage their immediate struggles.

6. Problems Encountered and Resources Required

Stigma and a distraction free environment
