30 dead, 60 injured in Maha Kumbh stampede

A three-member judicial commission was established by UP CM Yogi Adityanath to investigate

LBC News Network

Visakhapatnam

A stampede at the Maha Kumbh in Prayagraj on January 29 morning, shortly before the important "Amrit Snan" on Mauni Amavasya, left at least 30 people dead and 60 injured.

A devotee being rescued following a stampede

Devotees rushed towards the revered Triveni Sangam, causing mayhem during the enormous gathering that was predicted to attract about 10 crore people. According to DIG Kumbh Mela Vaibhav Krishna, who verified the deaths, "25 of

the 30 people who died have been identified, while the other five have not yet been identified."

The injured devotees have been taken away by their relatives, and some of these are from

other states as well—four from Karnataka, one from Assam, and one from Gujarat.

At the nearby medical college, 36 injured people are receiving care. The Mela administration has established hotline

number 1920 for the convenience of devotees.

He went on to describe the incident, "On the Mauni Amavasya Snan, between 1 and 2 am ahead of the Brahm Muhurta, a huge crowd gathered on the Akhara route, because

of which the barricades on the other side broke. The crowd on this side crossed to the other side and started running over devotees waiting for Brahm Muhurta. The administration quickly enforced the rescue operation and created a green corridor for ambulances, and took 90 injured to the hospitals. Unfortunately, 30 of those devotees have died."

A three-member judicial commission was established by Uttar Pradesh Chief Minister Yogi Adityanath to investigate the causes of the stampede.

Donald Trump administration intensifies crackdown on illegal immigrants

The Trump administration has removed 7,300 illegal immigrants from the United States

LBC News Network

Visakhapatnam

The Trump administration has removed 7,300 illegal immigrants from the United States in its first week in office, according to a Department of Homeland Security (DHS) announcement on Tuesday, January 28.

The action is a direct response to President Donald Trump's promise to expand deportations, particularly targeting violent offenders in the nation, and is a part of a larger crackdown on illegal

immigration. As part of his immigration-related national emergency declaration, Trump began the military deportation flights last week. To date, he has sent six planeloads of migrants to Latin America.

After Colombia refused to allow two U.S. C-17 cargo planes to land and instead deployed its own planes to pick up migrants after a confrontation with Trump, only four have landed, all in Guatemala. According to a US official who spoke to Reuters

under anonymity, a C-17 military cargo plane costs \$28,500 an hour to operate.

According to the official, the voyage back and forth to Guatemala took between 10 to 1 1/2 hours in the air, excluding time

spent on the ground or any procedures to get the plane ready for takeoff.

Speaking to Republican legislators Monday at his golf club in Doral, Trump promised that his use of military planes for deportations will continue and that any nations that reject would "pay a high economic price."

"For the first time in history, we are locating and loading illegal aliens into military aircraft and flying them back to the places from which they came," Trump told the crowd.

Like You

Like you I
love love, life, the sweet smell
of things, the sky-blue
landscape of January days.

And my blood boils up
and I laugh through eyes
that have known the buds of tears.

I believe the world is beautiful
and that poetry, like bread, is for everyone.

And that my veins don't end in me
but in the unanimous blood
of those who struggle for life, love,
little things,
landscape and bread,
the poetry of everyone.

AP Government initiates land acquisition for metro project in Vizag

The event acted as a prelude to the main demonstration on January 4, 2025

LBC News Network

Visakhapatnam

The procedure to acquire land for the rail projects in Visakhapatnam and Vijayawada was initiated by the Andhra Pradesh government on Thursday, January 30, 2025.

The Visakhapatnam and NTR district collectors received orders to that effect, and they directed the relevant officers to provide the information so that the notifications could

be published as required by law. Additionally, the government instructed the district collector of Visakhapatnam to move

forward with the land purchase procedure in order to build the metro rail project in Visakhapatnam. The

phase-1 development of the metro rail projects in Vijayawada and Visakhapatnam towns was approved by the AP cabinet during its December 2024 meeting. The two metro project DPRs, which cost Rs 11,009 crore, were forwarded to the center for clearance. In a letter to the center, Chief Minister N Chandrababu Naidu requested full finance for the Vijayawada and Visakhapatnam metro rail projects.

After TCS, Cognizant to start operations in the city soon

LBC News Network

Visakhapatnam

IT Minister Nara Lokesh announced that Within the next three months, Tata Consultancy Services (TCS) will open an office in Visakhapatnam.

The IT major will first start operations from a temporary location in the city, most likely the Millennium Towers in Rushikonda.

Cognizant, and that he would soon share the good news.

"Wipro and other IT giants are also looking at Andhra Pradesh to expand their operations. Infosys is also looking at setting up a campus. We are working to set up a global capability centre (GCC) in the state. NDA govt in the

state is giving confidence to industries to return and invest in AP," he said. He said that during the past seven months, the NDA government has created 4.1 lakh jobs and invested 6.33 lakh crore in the state. Additionally, Lokesh stated unequivocally that the Vizag Steel Plant would not be privatized.

1,200 kg of single-use plastic seized in the city

LBC News Network

Visakhapatnam

Greater Visakhapatnam Municipal Corporation (GVMC) teams have recovered almost 1,200 kg of single-use plastic since the city's plastic ban went into effect on January 1, according to municipal body authorities.

In November 2024, the GVMC launched a 45-day awareness campaign, and on January 1st, they implemented the single-use plastic ban. GVMC secretaries, sanitary inspectors, and public health authorities have been conducting raids throughout all zones to implement the ban in spite of it.

To raise awareness, stickers with the words "Say No to Plastic" and QR codes containing information about substitute items have been affixed to 55,000 trade licenses throughout zonal secretariats. In Autonagar, inspection teams have raided commercial buildings and plastic producers, seizing prohibited plastic products.

AP Government to develop Data City near Vizag

LBC News Network

Visakhapatnam

Andhra Pradesh is set to establish a cutting-edge Data City, complete with data centres and artificial intelligence hubs, in the vicinity of Visakhapatnam, according to a report in The Economic Times.

The Telugu Desam Party pledged during the election to build 2 million jobs in five years, and the state administration has announced plans to build the Data City in Madhurawada, which is close to Visakhapatnam.

prosperous Hitec City model.

The Data City, which will cover 500 acres, will act as a complete center for IT firms providing a variety of technology solutions. In accordance with a Memorandum of Understanding (MoU) between Google and the Andhra Pradesh

government, the government has already started purchasing property for the project.

Eighty acres would be given to Google for a data center, though specifics are still unknown. Additionally, 30 acres would be acquired by Tata Consultancy Services for its growth.

Naidu visits Davos, meets heads of top 15 companies

The project's goal is to supply water to the Krishna River from the Polavaram Right Main Canal

LBC News Network
Visakhapatnam

On the fourth day of his trip to Davos, Andhra Pradesh Chief Minister N. Chandrababu Naidu met with André Hoffmann, the Vice-Chairman of the Board of Roche Holdings and a well-known Swiss entrepreneur and environmentalist.

He also spoke with CNN's Becky Anderson and Achim Steiner, the head of the UNDP.

He made it clear that he is now promoting the "AP

Brand" globally after serving a fourth term as chief minister and that he is outlining for everyone the benefits and chances the state offers for industry establishment and investment. Naidu reported

that he and the chief ministers of Maharashtra and Telangana spoke at a session on energy and artificial intelligence (AI) at Davos, where he participated in 27 sessions and the ministers, Lokesh

and Bharat, attended 33.

The Chief Minister made it apparent that the emphasis currently is on how to utilize Andhra Pradesh's extensive coastline.

He said that everyone in Davos this time only talked about green energy, green hydrogen, natural farming, artificial intelligence, and deep technology, and he was confident that significant investments would be made in the state.

AP's Republic day tableau gets third prize

LBC News Network
Visakhapatnam

The Central government presented the Andhra Pradesh tableau with a jury prize as part of the 76th Republic Day parade, which took place at Kartavya Path in New Delhi.

The famous Etikoppaka toys were used to create this tableau, which highlights the importance of the State's handicrafts and symbolizes its rich legacy, according to a statement released here on Wednesday by Himanshu Shukla, head of the

Department of Information and Public Relations. People from all over the country were drawn to it, he continued, and it stood out as the centerpiece of the Republic Day festivities. The acknowledgment was welcomed by Chief

Minister N Chandrababu Naidu and Deputy Chief Minister Konidela Pawan Kalyan.

They congratulated the officials and artists who worked on the tableau's presentation on social media.

Garuda Aerospace to invest Rs 100 cr to develop Drone City in AP

LBC News Network
Visakhapatnam

Garuda Aerospace, a drone maker, announced on January 30 that it would invest Rs 100 crore to create a "Drone City" in Andhra Pradesh.

According to a statement from Garuda Aerospace, the planned city, which would be located in Orvakal village in the Kurnool region of Andhra Pradesh, will work as a center for drone innovation, encouraging research, drawing in top talent, and advancing India's position as a leader in drone technology.

It stated that the announcement was made during a strategic meeting with Minister of Civil Aviation Rama Mohan Naidu Ji. Agnishwar Jayaprakash, the founder and CEO of Garuda Aerospace, also discussed the company's alignment with the "Viksit Bharat Sankalp Yatra," its importance for national development, and its continued contributions to the "Namo Drone Didi" initiative, which uses drone technology to empower rural women.

Civic services available on WhatsApp in AP, a first in country

LBC News Network
Visakhapatnam

In an effort to improve civic services' accountability, speed, and openness, the Andhra Pradesh government introduced WhatsApp governance, the first of its kind in the nation.

161 services will be made available in the first phase to assist individuals in reducing the number of times they visit the local offices.

"As Andhra Pradesh advances in digital technology adoption, this initiative aims to accelerate governance and make public services more

accessible to citizens," according to a statement released by the government.

At his Amaravati residence, Nara Lokesh, the Minister of Information Technology and Education and the son of Chief Minister N Chandrababu Naidu, formally opened the service. Departments include Endowments,

Energy, APSRTC, Revenue, Anna Canteens, CM Relief Fund, and Municipal Administration will provide a range of services via WhatsApp as part of the initial phase.

In the second phase, more services will be added, bringing the total number of services available to 520.

College celebrates 76th Republic Day

LBC News Network

College

The 76th Republic Day was marked with grandeur at Dr. Lankapalli Bullayya College, featuring impressive parades by NCC students from six units, including Army, Navy, Air Force wings, NSS, Bharat Scouts, and Guides. The event was attended by Prof. K.C. Reddy, President of the college, who received the guard of honor and advised students to uphold high standards of ethics and self-discipline. The highlight of the event was a skit on 'Section Formation' by NCC students, showcasing their skills and teamwork. This was followed by cultural programs and the presentation of medals and certificates to outstanding students and staff members. Dr. G. Madhu Kumar, Secretary and Correspondent, along with the principals, staff, and students, made the occasion a memorable one.

Local RDC selections held in the Campus

LBC News Network

College

On January 10, 2025, the Local RDC selection took place on the college premises. A total of 28 cadets were selected for the Visakhapatnam Group. Among these, 18 cadets were from our college, with 12 cadets from the 2 (A) Arty Bty NCC Unit and 6 cadets from the 13 (A) BN NCC Unit.

College celebrates National Voters' Day

LBC News Network

College

Dr. Lankapalli Bullayya College celebrated National Voters' Day on January 25th, 2025, by taking an oath to uphold the power of voting. Principals, staff, NCC, NSS, and BSG cadets came together to participate in this significant event, reaffirming their commitment to exercising their right to vote and shaping the future of our nation.

College takes out 75-ft-long 'Tiranga' rally

LBC News Network

College

As part of the 75th Republic Day pre-celebrations, a 75-ft-long 'Tiranga' rally was taken out by Dr Lankapalli Bullayya College on 23rd January 2025. Along with the college staff, 6 wings of NCC ARMY, NAVY, AIRFORCE, NSS and Bharath Scouts and Guides cadets participated in the rally. The 4.2km rally was flagged off at the college by UG & PG Principal Dr. G.S.K. Chakravarty. Engineering College Principal Professor D. Deepak Chowdary, Junior College Principal Mr. K. Someshwar Reddy, staff and 500 enthusiastic students from all 6 divisions participated.

College celebrates 150 years of Vande Mataram

LBC News Network

College

On January 24th, 2025, Dr. Lankapalli Bullayya College celebrated 150 years of Vande Mataram. Both staff and students participated in the event.

Students win Eenadu Sports League (ESL) cricket competition

LBC News Network

College

Dr. Lankapalli Bullayya College team emerged as the winners of the 'Eenadu' Sports League (ESL) cricket competition at the district level. Andhra Medical College Principal and Additional DME Dr. G. Buchiraju and VDCA Prof. D. Sanjeevi presented medals and trophies to the winning teams. Secretary and Correspondent Dr. G. Madhu Kumar congratulated the students on their win.

Future Trends and Challenges

LBC News Network

Visakhapatnam

With the introduction of Artificial Intelligence, the way we view professional and personal lives is changing. Let's talk about how future trends and challenges will change the world for better or worse.

The Hyper-Connected World: Each technology generation has transformed our connections, with 3G introducing data, 4G enabling video, and 5G facilitating machine-to-machine communication in connected environments. The upcoming 6G will unify homes, cars, and cities into a single connected ecosystem. Coupled with the Space Log Jam's launch of 20,000 satellites, we can expect widespread high-speed broadband and precise location services. This hyper-connected landscape will foster new disruptive business models, making disconnection a rare luxury.

Aged population: The world's population is not only growing, but people are also living longer. The number of centenarians is expected to rise dramatically from 500,000 today to over 26 million by 2100. Countries like the UK, Japan, and China will see increasing populations over 65, which will necessitate improved elderly care—Japan is even considering robots for this purpose. Additionally, policies may be needed to attract more immigrants to offset aging workforces and declining birth rates.

Lost Cities: Cities like Miami are changing rapidly due to rising sea levels and climate change. Increased flooding and altered weather patterns have influenced building designs, leading to higher first floors and more seawalls.

However, these measures may only be temporary solutions. If trends continue, we could face significant loss of cities,

islands, and low-lying areas like Bangladesh, leading to profound economic impacts and a potential surge in climate refugees.

Hyper-Connected World

Urban areas are already under pressure, and mass migration could further strain infrastructure and services.

Dawn of Technology Singularity: This trend outlines the evolution of AI from narrow forms to the onset of singularity, where advanced technologies could unpredictably transform our reality. With Generative AI, we have

Safe Car Travel: Despite rapid urbanization and advancements like bullet trains and the Hyperloop, cars will remain prevalent on our roads.

The number of vehicles is expected to increase significantly in the coming decades, especially in countries like China with a growing middle class.

As driverless car technology advances, addressing safety, pollution, and the potential challenges of autonomous vehicles will be crucial.

Resources Dwindling: Rare

Aged population

Increased vehicles

entered the General AI era, though true Artificial SuperIntelligence (ASI) has yet to be realized.

A key development is the shift toward an Autonomous world, presenting a \$10 trillion opportunity.

By 2035, emerging computing sciences like Neuromorphic, DNA, and Quantum computing will challenge Moore's Law and accelerate the transition from General AI to Super AI, leading to Technology Singularity.

earth metals are necessary for the production of all the new technology and gadgets that define the twenty-first century; the typical smartphone contains more than sixty "ingredients."

The planet's natural resources are being strained as a result.

In China, where 90% of the world's rare earth metals are found, mines are predicted to run out within the next 20 years, and it is difficult to find suitable alternatives.

Settling in other worlds: How will space tourism businesses ensure the safety of their operations? As Stephen Hawking has pushed us to do, how will we find a means to transport humans to Mars or another planet to live there? Today, space flight may seem like the purview of space agencies and millionaires, but when it becomes more widely available, a number of new difficulties will surface.

With more money being spent than ever before to send humans to the inky abyss, outer space is beginning to resemble our backyard rather than the ultimate frontier. As a result, the challenge's logistics, safety, and diplomacy all need careful thought.

Dawn of Technology Singularity: This trend tracks the evolution of AI from narrow AI to the onset of singularity, characterized by intelligent technologies that could drastically alter our reality.

With the rise of Generative AI, we have entered the General AI era. Currently, Artificial Superintelligence (ASI)—where AI matches human consciousness and intelligence—does not exist. A significant aspect of AI growth lies in transitioning to an Autonomous world, representing a \$10 trillion opportunity.

By 2035, advancements like Neuromorphic Computing, DNA computing, and Quantum computing will challenge Moore's law and facilitate the transition from General AI to Super AI, allowing machines to surpass human intelligence and achieve Technology Singularity.

Microsoft, AI defend hefty AI spending despite DeepSeek's low cost

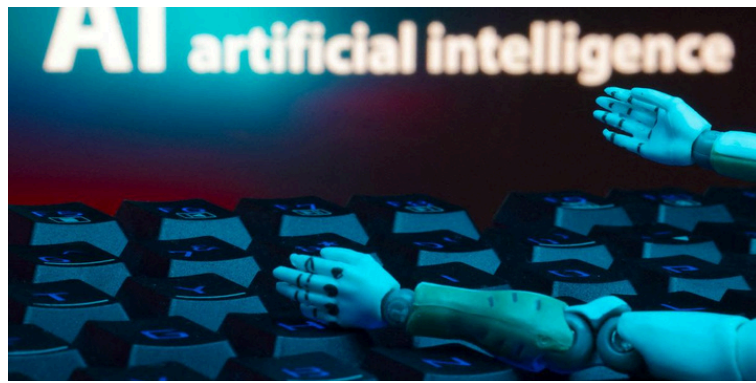

Two spacecraft were deployed into the intended low earth orbit ON December 30

LBC News Network

Visakhapatnam

Days following the Chinese startup, when the U.S. IT industry was rocked by DeepSeek's revelation of a breakthrough in low-cost AI computing, the CEOs of Microsoft and Meta justified significant spending, arguing that it was essential to remaining competitive in the emerging market.

Although DeepSeek's rapid advancements have raised

questions about America's leadership in AI, with models that it says can perform on par with or better than Western competitors at a fraction of the cost, U.S. executives

stated on Wednesday that expanding corporate needs required the construction of massive computer networks. In the current fiscal year, Microsoft has set aside \$80 billion on AI,

and Meta has committed up to \$65 billion. That pales in comparison to the approximately \$6 million DeepSeek claimed to have invested in creating its AI model.

That is the amount spent on processing power, not total development expenses, according to Wall Street analysts and U.S. executives. However, the high expenses and lack of significant returns appear to be wearing thin on some investors.

ISRO's 100th launch from Sriharikota takes off

LBC News Network

Visakhapatnam

When the NVS-02 was launched on January 29 at 6.23 a.m. by a GSLV-F15 rocket from the Indian Space Research Organization's launch center in Sriharikota, Andhra Pradesh, it wasn't simply another satellite launch from the space agency. It was its hundredth.

ISRO chief V Narayanan stated, "This mission is the 100th launch from our launchpads, which is a very significant milestone for India." Since he assumed office on January 16, this is the first launch. With this launch, India's

Geosynchronous Satellite Launch Vehicle with an in-house cryogenic stage has made its eighth successful flight. As a member of the NavIC constellation, NVS-02 will support precision agriculture as well as navigation on land, in the air, and at sea. "I am extremely happy to announce from the spaceport of ISRO, that the first launch of this

year, 2025, has been successfully accomplished, with GSLV- F15 launch vehicle precisely injecting the navigation satellite NVS-02 in the intended required (GTO) orbit," added Narayanan.

An estimated \$8 billion is spent on India's space sector, which accounts for 2-3% of the worldwide space economy.

Arvind Kejriwal accuses Haryana of sending ammonia-laden water to Delhi

LBC News Network

Visakhapatnam

Aam Aadmi Party (AAP) national convener Arvind Kejriwal once again charged the BJP-led Haryana government with purposefully delivering ammonia-tainted water to Delhi ahead of his report submission to the Election Commission of India (ECI) on Friday. While speaking to the media on Friday, Kejriwal stated, "I want to thank the people of Delhi that the struggle of the AAP government and 2-2.5 crore citizens has paid off. The Haryana government was sending ammonia-laden water to Delhi. On January 26-27, the ammonia level was 7 PPM, but today it has come down to 2.1 PPM. This clearly shows that the BJP-led Haryana government intended to create trouble for Delhi."

Kejriwal made this statement while he and Delhi Chief Minister Atishi and Punjab Chief Minister Bhagwant Mann were getting ready to report to the Election Commission of India (ECI) on the ongoing dispute over the water quality of the Yamuna River.

Eight Israeli and Thai hostages released from Gaza

LBC News Network

Visakhapatnam

As part of the ceasefire agreement with Israel, eight further hostages held by Hamas in Gaza were freed amid tumultuous scenes.

Before being turned over to Israeli soldiers and transported to Israel, Hamas turned over three Israelis and five Thai nationals to the Red Cross.

Afterwards, 110 Palestinians—32 with life sentences and 30 minors—were freed from Israeli prisons. The treatment of the hostages upon their handover prompted Israel

to postpone their release. With Thursday's releases, there have already been 15 captives released since the truce went into force on January 19.

They're still holding eighty-two. In a stage-managed incident in Jabalia, in northern Gaza, Israeli soldier Agam Berger, 20, was the first to be freed on Thursday after being

brought through a scene of rubble by masked militants. Armed Hamas members held back crowds of civilians while she appeared on a podium, received a certificate, and was handed over to the Red Cross. She was the final woman left in Gaza after seven other women from an unarmed squad of observers were abducted on October 7, 2023.

Virat Kohli clean bowled for 6 on Ranji Trophy comeback

Delhi was at 103 for four at the end of 30 overs, 141 runs behind Railways' first-inning total

LBC News Network

Visakhapatnam

On day two of Friday's league-stage match against Railways at the Arun Jaitley Stadium, Virat Kohli's comeback to the Ranji Trophy lasted just 15 deliveries.

Before Railways seamer Himanshu Sangwan put an end to his off-stump, Kohli had a rough start as he walked into a loud atmosphere and

overwhelming acclaim from his home audience.

Kohli tried an odd swipe across the line as he moved forward to an oncoming delivery that pitched a bit

on the fuller side of good length. As it passed Kohli's blade and struck the off-stump, the ball stayed just below the surface. Earlier, during the recent Border-

Gavaskar Trophy in Australia, Kohli was dismissed frequently due to velocity at both ends, which led to deliveries outside the off-stump.

After Delhi lost opener Sanat Sangwan to Himanshu in his subsequent over, Kohli's dismissal set off a mini-collapse. Delhi was at 103 for four at the end of 30 overs, 141 runs behind Railways' first-inning total.

Dragons hit back to hold Rudras, enter semifinal

LBC News Network

Visakhapatnam

UP The Tamil Nadu Dragons advanced to the Hockey India League semifinals at Birsa Munda Hockey Stadium here on Wednesday after the Rudras gave it their best but were unable to win in regulation time.

The game ended 2-2 in regular time, and Dragons needed just one point to qualify for the top four, which they did. Later, Rudras prevailed 3-2 in sudden death shootouts, but it made no difference. In the opening game of the day, Soorma

Hockey Club defeated Shraichi Rarh Bengal Tigers 1-1 in regulation time before winning 3-0 in a shootout.

Thus, the Bengal Tigers, who had 19 points, were at the top of the table, followed by Soorma, who had 19 points but

less victories. Both Toofans and Dragons have 18 points, but Toofans' superior goal differential allowed them to finish third.

After that, Dragons went all out, needing only a draw to secure a spot in the top four.

Man City rallies to beat Club Brugge and advance in Champions League

LBC News Network

Visakhapatnam

Manchester City nearly managed to stay in the Champions League. Paris Saint-Germain elegantly preserved its exceptional standing.

Thankful to be one of the 24 teams in the knockout stage, both had taken the chance of humiliating eliminations before prevailing on Wednesday.

The defending champion Real Madrid or Bayern Munich, who placed in the middle of the table following the completion of the 36-team standings, will also be included in the new playoffs-round draw on Friday.

In a game that had to be won, City came back from the brink of disaster to defeat Club Brugge 3-1. Substitute Savinho helped the 2023 champion, who was behind 1-0 at halftime and ranked 26th in the live standings, avoid elimination.

City manager Pep Guardiola, who had a difficult evening on the sidelines and was given a yellow card, remarked, "In the second half we let

our souls and hearts free." After finishing in 22nd place, City is relieved to learn that either Madrid or Bayern, who placed 11th and 12th in the bracket, will be their playoff round opponent.

After starting the game in 22nd place, PSG easily defeated Stuttgart 4-1 thanks to a hat trick from Ousmane Dembélé, eliminating the German team.

Kidambi Srikanth, Sankar

Muthusamy Subramanian out of Thailand Masters Badminton

LBC News Network

Visakhapatnam

After losing their individual men's singles quarterfinal matches here on Friday, former world no. 1 shuttler Kidambi Srikanth and Sankar Muthusamy Subramanian were eliminated from the Thailand Masters Super 300 tournament.

In one hour and ten minutes, former world junior no. 1 Subramanian fought hard against another Chinese player, Xuan Chen Zhu, before falling 21-19 18-21 13-21, while Srikanth lost 17-21 16-21 against sixth seed Zheng Xing Wang of China.

Later in the day, second seeds Muhammad Shohibul Fikri and Daniel Marthin of Indonesia will face the eighth-seeded Indian men's doubles team of Pruthvi Krishnamurthy Roy and K Sai Pratheek.
